Procut 10.4" 750Watts to 2.0KW AC Servo Full System kits

A full kit of components to allow the easy retrofit of most paper guillotines. All parts are supplied from the controller and electrical kit to pulleys and belts. A machining service is available should you require pulleys to be bored and broached to specific sizes.

A kit comprises:

- PMC 10.4" Controller
- Procut Software
- Cables from PMC to Electrical Cabinet
- Electrical Cabinet
- 4 Proximity sensors
- 4 Sensor Extension Cables
- 4 Sensor Mounting Brackets
- Aux Cable for E-stop, Air etc connections.
- Encoder Extension Cable
- AC Servo Motor with Encoder and Mounting Bracket
- 24T and 72T pulley for 3:1 ratio (others on request)
- 1050mm and 800mm 15mm Belt

All cables are terminated to plugs to enable a quick and easy installation. As all systems are tested complete before they ship you can be assured that installation is a smooth process with minimal setup time required.

** Please note that all current AC SERVO Procut kits require a minimum of 200V to operate.*

Prices for 10.4" full kit with AC servo motors:

Procut 10.4" 0.8KW AC Servo Full System £2400.00

Procut 10.4" 1.0KW AC Servo Full System £2500.00

Procut 10.4" 1.5KW AC Servo Full System £2650.00

Procut 10.4" 2.0KW AC Servo Full System £2995.00

Procut 5.7" AC Servo Full System Kits

A full kit of components to allow the easy retrofit of most paper guillotines. All parts are supplied from the controller and electrical kit to pulleys and belts. A machining service is available should you require pulleys to be bored and broached to specific sizes.

A kit comprises:

- PMC Controller
- Procut Software
- Cables from PMC to Electrical Cabinet
- Electrical Cabinet
- 4 Proximity sensors
- 4 Sensor Extension Cables
- 4 Sensor Mounting Brackets
- Aux Cable for E-stop, Air etc connections.
- Encoder Extension Cable
- AC Servo Motor with Encoder and Mounting Bracket
- 24T and 72T pulley for 3:1 ratio (others on request)
- 1050mm and 800mm 15mm Belt

All cables are terminated to plugs to enable a quick and easy installation. As all systems are tested complete before they ship you can be assured that installation is a smooth process with minimal setup time required.

** Please note that all current AC SERVO Procut kits require a minimum of 200V to operate.*

Prices for 5.7" full kit with AC servo motors:

Procut 5.7" 0.8KW AC Servo Full System £2100.00

Procut 5.7" 1.0KW AC Servo Full System £2200.00

Procut 5.7" DC Servo Full System Kit

A full kit of components to allow the easy retrofit of most paper guillotines. All parts are supplied from the controller and electrical kit to pulleys and belts. A machining service is available should you require pulleys to be bored and broached to specific sizes.

A kit comprises:

- PMC 5.7" Controller
- Procut Software
- Cables from PMC to Electrical Cabinet
- Electrical Cabinet
- 4 Proximity sensors
- 4 Sensor Extension Cables
- 4 Sensor Mounting Brackets
- Aux Cable for E-stop, Air etc connections.
- Encoder Extension Cable
- 1.7nM DC Brushed Servo Motor with Encoder and Mounting Bracket
- Can operate from 110/230V
- 15T and 72T pulley
- 550mm and 800mm Belt

All cables are terminated to plugs to enable a quick and easy installation. As all systems are tested complete before they ship you can be assured that installation is a smooth process with minimal setup time required.

Procut 5.7" DC Servo Full System £1999.00

Procut 10.4" DC Servo Full System kit

A full kit of components to allow the easy retrofit of most paper guillotines. All parts are supplied from the controller and electrical kit to pulleys and belts. A machining service is available should you require pulleys to be bored and broached to specific sizes.

A kit comprises:

- PMC 10.4" Controller
- Procut Software
- Cables from PMC to Electrical Cabinet
- Electrical Cabinet
- 4 Proximity sensors
- 4 Sensor Extension Cables
- 4 Sensor Mounting Brackets
- Aux Cable for E-stop, Air etc connections.
- Encoder Extension Cable
- 1.7nM DC Brushed Servo Motor with Encoder and Mounting Bracket

- 550mm and 800mm Belt

All cables are terminated to plugs to enable a quick and easy installation. As all systems are tested complete before they ship you can be assured that installation is a smooth process with minimal setup time required.

** Please note that all current AC SERVO Procut kits require a minimum of 200V to operate.*

Procut 10.4" DC Servo Full System £2300.00

Procut AC Inverter Kit 5.7"

This kit of parts is for installation to Guillotines for the control of the back-gauge position. The kit is intended for use where the customer wants to retain the AC motor on the machine and provide their own AC motor drive.

Contents of the kit are as follows:

- PMC motion controller 5.7" Display
- ProCut software
- Encoder 1000 PPR
- Cable 37 ways to 37 and 44 way D-type
- Converter Board 37 ways
- Sensor Brackets (4 units)
- Sensor Proximity (4 units)
- Screened Control Cable
- USB stick with manuals

Note this kits can be supplied with a preprogramed inverter as an extra.

All our products are 100% tested and inspected before shipment to ensure a trouble free installation.

Procut 5.7" inverter kit price £1400.00
